## Professional Summary

Full Stack Developer with hands-on experience building scalable, responsive, and user-focused web applications. Proficient in Next.js, React, Node.js, and MongoDB, with strong collaboration skills. Experienced in delivering production-ready solutions that solve real business challenges efficiently.

## Professional Experience

### Full-Stack Developer (Project-Based/Independent)

2024 - Present

- Designed and built full-stack web applications using **Next.js, React, Node.js, and MongoDB**.
- Developed and consumed **REST APIs** with authentication, authorization, and data validation.
- Implemented **role-based access control** for admins and users.
- Optimized application performance and improved code maintainability.
- Integrated **payment workflows** and handled secure transaction records.
- Collaborated on UI/UX implementation to ensure responsive, accessible, and user-friendly interfaces.
- Optimized application performance and improved code maintainability.

## Frontend Developer (Intern) - Lassod Technology, Nigeria

May 2024 – October 2024

- Developed responsive frontend components using Next.js.
- Collaborated with designers and backend developers to integrate APIs and implement UI/UX designs.
- Built scalable, reusable components ensuring accessibility and cross-browser compatibility.

## Key Projects

### Online Clearance System – Full Stack Application

- Automated manual student clearance process, reducing administrative delays and errors.
- Built frontend with React/Next.js and backend with Node.js and MongoDB.
- Implemented secure role-based authentication for students and administrators.

### Agriculture E-Commerce Platform – Full Stack Application

- Developed a platform connecting farmers with buyers to increase product visibility and sales.
- Built responsive UI, product listing, ordering, and payment integration.
- Optimized backend APIs for performance and scalability.

### Real Estate App – Frontend Application

- Enabled users to search, filter, and view properties efficiently.
- Built frontend with React/Next.js, focusing on accessibility and dynamic data handling.
- Collaborated with mock backend for real-time property listings simulation.

## Education
